

CREATIVE PROBLEM SOLVING AND DECISION MAKING

OVERVIEW

Whether as an individual or an organisation, we confront daily challenges and issues. It is of utmost importance to identify the problems appropriately. Identification of problems will lead to the appropriate thinking required to solve the issues. Problem identification and creativity are all about looking at the various perspectives and being daring enough to do things differently and effectively.

WORKSHOP OBJECTIVES

By the end of the one-day workshop, participants will be able to:

- Identify and analyse problems effectively
- Use creativity as a learning skill
- Be involved in continuous learning and positive self-development

WHO SHOULD ATTEND?

All professionals striving for better results through more effective problem identification methods and creative thinking skills should attend this workshop.

WORKSHOP OUTLINE

- Module 1: Creative Problem Solving Model
- Module 2: Components of Creativity
- Module 3: Exploring the Brain and Mind
- Module 4: Essential Problem Identification Tools
- Module 5: Creative Thinking Techniques and Practical Application
- Module 6: Decision Making Techniques
- Module 7: Building Creativity in Teams
