

Project Management Professional (PMP) Exam Preparation Course

OVERVIEW

This course is intended for candidates undertaking or wish to undertake the Project Management Professional (PMP) examination. The course follows the Project Management Body of Knowledge (PMBOK) 5th Edition, which the PMP examination is based on will come to effect from 1st August 2013.

This course is ideal to candidates planning to take the computer-based examination. The title PMP is an internationally accepted recognition of project management knowledge and professionalism of the successful candidate. Simply put, this is a professional certification of the candidate in the area of project management.

OBJECTIVES

The examination may be taken at Prometric HQ computer test centre, at a pre-appointed date and time, at your choice venue; that is, when the application to sit for the examination is successful confirmed through an eligibility letter. The examination consists of 200 multiple-choice answers (1 out of 4 is the right answer), and to be completed within 4 hours. Typically the passing mark is 61%.

WORKSHOP OUTLINE

The Introduction provides key fundamentals of project management. Discover the basic facts of project management and its successful implementation, the project sponsor, the life cycle phases, and the main skills and expectations of project managers. Each of the TEN knowledge areas contains the processes that need to be accomplished within its discipline in order to achieve an effective project management program. Each of these processes also falls into one of the five basic process groups, creating a matrix structure such that every process can be related to one knowledge area and one process group.

WHO SHOULD ATTEND?

Project managers, team members, field staff members, project engineers, design engineers, project leaders, administrators, industrial engineers, program managers, manufacturing engineers, operations managers, functional managers, Information Technology professionals, R&D managers, marketing directors, and others involved directly or indirectly with projects in virtually every industry, and who needs a certification to give the professional recognition to bid for projects.
