## INTRODUCTION

Every company's survival, progress, whether it's a going concern or gets liquidated depends on the basis of proper estimation of its costs and estimation of product or service pricing. Every cost conscious executive or specific project manager, cost estimator, or organization is in need of improving their cost estimating success. This seminar endeavors to illustrate and explain how to develop costs and how they can be used not only to estimate the product / service cost, but also how to use them to determine a competitor's likely bid / tender price. It explores the estimating methods typically used to estimate costs and explains the advantages and disadvantages of each, demonstrates several estimating methods, and includes a cost estimating methodology that participants can tailor to their own organisational needs.

## AUDIENCE

Cost and Accounts' Executives, Managers, Directors, Planners and Analysts

## OUR MODULE : FI202

---
