INFORMATION

INTRODUCTION

An enterprise's survival as an on-going concern depends on the management's stewardship and process of planning, control and decision making. Key personnel of the enterprise need to develop and understand the application of costing and management accounting techniques, on a short-term and long-term basis.

This seminar highlights and provides some of the basic techniques required to enable the participants to develop various methods and put them into application and practice on a daily operational basis.

LEARNING OBJECTIVE

- Explain and understand the role of costing and management accounting within an organization and the requirements for management information
- Describe costs by classification and purpose
- Identify the appropriate material, labor and expenses costs
- Understand and demonstrate the principles of costing and management accounting
